---

“I feel very fortunate to be able to be in the field of medicine and am proud to have received an excellent education that provides me with a strong foundation to help improve my patient's lives. I have studied my Jewish Heritage extensively and received Rabbinical ordination as I view the spiritual aspect of life to be so integral to every aspect of what each of us do every day. Spiritual integrity and balance plays a huge role in the healing process and I always try to integrate all of my learning into a unified synthesis of working toward patient wellness.

“In addition to a wide background of rotations in both inpatient and outpatient settings, largely within the greater New York City metropolitan area, I have found a great affinity for pediatrics. I have studied and worked extensively in pediatrics, helping me deliver even better neurological services for our younger patients in areas of attention deficit, epilepsy, headache and learning disabilities, just to name a few.

“I truly enjoy the daily work I do and love interacting with patients and their families. I am blessed to be able to work in a field where I can help improve and touch lives in a very important way every day and I am grateful for this opportunity. I look forward to meeting with you and your loved ones and stand committed to doing all I can do to improve the quality of your lives the best I possibly can.”

Highly advanced, skilled & experienced care.
